1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The status identifiers for claims 1 - 32 improperly state that the claims are withdrawn. The claims have been cancelled (see third paragraph of the Remarks).

In claims 1 - 32, line 1, the status identifier "(withdrawn)" was changed to -- (Cancelled) --.

2. The following is an examiner's statement of reasons for allowance: Van Dell et al. teach an intrauterine monitoring device that includes a light source, a light sensor, and a pressure sensitive switch (see Figures 1, 4; column 4, line 57 - column 5, line 29). The pressure sensitive switch shuts down transmission of the sensor when maternal contractions occur. This allows measurement of only unstressed fetal conditions. The effect of the arrangement of Van Dell et al. is to turn the sensor off when the measured pressure is above a maximum threshold level. In contrast, the controlling device of the instant application is "configured to enable sensor operation when the performing component is fastened to the tissue to the extent that the detector receives only rays which are transmitted through or reflected from the tissue" which essentially turns the sensor on when conditions measured by the controlling device are above a minimum threshold level. The prior art does not teach or suggest such an arrangement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
